The Instructional Improvement Cooperative at ESD 105 is

designed to provide online resources and professional development opportunities to enhance each student's classroom experience. Integrating technology into the classroom in conjunction with effective instructional practice provides new and exciting opportunities that challenge students and help them to achieve greater academic success.

Professional Development

The Cooperative provides on-site professional development opportunities for all staff to enhance teaching and learning practices. Trainings are also available for the online resources, including state online resources. Staff members can attend trainings at the ESD or schedule times for their individual buildings.

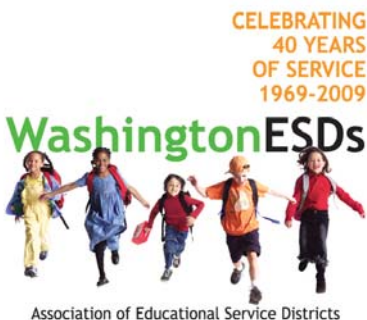

- **Rigor and Student Evidence** – Trainings and support in your building can be provided on increasing student engagement and rigor in the classroom. **Teachers** will come away with immediate strategies to use in the classroom and will be engaged in job-embedded professional development throughout the year. **Administrators** will become more proficient in what meaningful student engagement looks like in the classroom and how to facilitate teachers in looking at student evidence.
- **Using Data to Inform Instruction** – This facilitation can be done at the regional or district level with teachers and administrators.

- **Interactive workshops to enhance secondary literacy teaching skills**

Graduation Requirements Support

In addition to support and in-district training for Online GLEs, School Improvement Plans, and the School Report Card, the ESD 105 Instructional Improvement Cooperative provides assistance in the following:

- **Student Learning Plans** – Continued support is provided on the state SLP tool and student interventions. Facilitation with staff is available and links to RTI and AYP are discussed.
- **Collection of Evidence** – Support is provided at the building level on the alternative assessments to the WASL, with an emphasis on the Collection of Evidence.
